1. Live data that is imported into Excel refreshes by default. **1 / 1 point**

- ( ) Yes, that's true.
- (•) No, that's not true.

Correct
You are correct - the statement is not true. You need to either manually refresh live data or change the settings to refresh automatically at a custom-set interval.

2. Which of the following functions is used in the videos to rank a list of abbreviations? **1 / 1 point**

- (•) COUNTIFS
- ( ) RANK
- ( ) SMALL
- ( ) LARGE

Correct
Yes, spot on. It's not an obvious choice here but the **COUNTIFS** is a creative way to rank the values in the list of currency abbreviations.

3. Which of the following functions did we need in order to sort our data in the video? **1 / 1 point**

Multiple options are possible and partial credit will be given.

- [x] MATCH

Correct
Yes, that's right. The **MATCH** function tells Excel which row to look in.

- [ ] RANK
- [x] ROW

Correct
Yes, that's right. The **ROW** function tells the **MATCH** function what rank in the list should be matched by 'counting down' from the first cell in the series.

- [x] INDEX

Correct
Yes, that's right. We need the **INDEX** function to return information from our range

- [x] COUNTIFS

Correct
Yes, that's right. The **COUNTIFS** function tells Excel to count the items in a range and under what conditions they are to be counted.

- [ ] SORT
