

🎉 **Congratulations! You passed!**

Grade received 100% To pass 80% or higher

Go to next item

1. In the **Evaluate Formula** dialogue box, what happens when you press **Step In**?

1 / 1 point

- ☐ The value of the highlighted expression is displayed.
- ☐ The shows the formula for the next cell below.
- ☒ The formula of the highlighted component is displayed in a new line.
- ☐ The cursor moves to the next part of the formula.

✔ **Correct**

Yes, that's correct. The Step In feature displays a formula that is referred to in your active formula in a separate box.

2. In order to evaluate each part of a formula individually, I can use

1 / 1 point

- ☒ Evaluate Formula
- ☐ Trace Errors
- ☐ Go to Special, then Formulas and select Errors
- ☐ Show Formulas

✔ **Correct**

Yes, this is correct. The **Evaluate Formula** tool evaluates the formula in the active cell, step-by-step.

3. Which option allows the user to check the changes applied to a cell(s) containing formula in other worksheets without directly checking the worksheet?

1 / 1 point

- ☐ Evaluate Formula
- ☐ Trace Dependents
- ☒ Watch Window
- ☐ Trace Precedents

✔ **Correct**

Yes, that's right. The Watch Window will allow you to watch the use of a formula and its result even when the cells are not visible on your active worksheet. Very handy!

**NOTE:** This question refers to a feature in Excel that is not available in the Mac version of Excel. However, you can still answer the question by watching the Practice Video on Evaluate Formula, Watch Window in this week.
