

✓ **Congratulations! You passed!**

Grade received **100%** To pass 80% or higher

[Go to next item](#)

1. Which of the following named ranges is valid?

1 / 1 point

- ☐ Quarter-1
- ☐ Sales 2016
- ☒ \_Sales2016
- ☐ Qtr1

✓ **Correct**

Yes, this is correct. A named range can begin with an underscore symbol and contain the text string Sales2016.

2. Named ranges behave like absolute cell references

1 / 1 point

- ☒ True
- ☐ False

✓ **Correct**

Indeed. They remain fixed when auto-filling formulas across your spreadsheet.

3. Named ranges always contain a single cell.

1 / 1 point

- ☐ True
- ☒ False

✓ **Correct**

Yes, that's right. A named range can refer to a single cell or a range of cells.

4. Which of the following are valid characteristics of names for named ranges?  
(Multiple answers possible. Partial credit awarded)

1 / 1 point

- ☐ Labels used in cell references
- ☐ Hyphens
- ☒ Letters

✓ **Correct**

Great! These are allowed.

- ☒ Restricted length (no more than 255 characters)

✓ **Correct**

Yes! Hopefully, you have no need to create a name that is as long or longer than 255 characters!

Underscores

Yes! You can use underscores in a name for a named range.

5.

Uma wants to create a name for the range showing the Expenses for 2017. She types in Exp2017 but Excel rejects the name. What is the problem?

1 / 1 point

Exp2017 is a mix of letters and numbers which is not permissible for names

Exp2017 is a cell reference

Exp2017 is a heading in the document so it cannot be used as a name

Yes! Excel reads this as EXP2017 which is just like E27, and is thus a cell reference which is not allowed to name a range.

6.

We can use the name box to:

1 / 1 point

(Multiple options possible. Partial credit awarded)

Name a new named range.

Yes, great work here!

Navigate to the range of an existing named range.

Yes, great work here!

Change the name of an existing named range.
