1. You want to insert 3 columns. Which of the options below will help you to achieve that?

1 / 1 point

*Multiple answers are possible. Partial credit will be awarded.*

- ☐ You right-click on the column header and go to **Insert**, then type the number 3
- ☒ You select a column then click the **Insert** button on the **Home** tab 3 times

Yes, this is correct. Can you think of any other ways that might be quicker?

- ☒ You select 3 columns, right-click and go to **Insert**

Yes, spot on! Isn't that a great way to insert more than one column?

2. Sean has carefully set up some complicated **Conditional Formatting** to one of the columns in his worksheet. He now wants to apply the same rules to another column in his worksheet. What is the quickest way for him to do this?

1 / 1 point

- ☐ He can copy and paste the original column and then delete the content of the cells using the **Clear** tool.
- ☒ He can use the **Format Painter**.
- ☐ There is only one way, he needs to select the next column and then set up the **Conditional Formatting** rules again.

Yes, 100% The **Format Painter** copies ALL formats, this includes **Conditional Formatting**. This is definitely the quickest way to apply the same formatting rules to another column.

3. Open the attached workbook. You will notice that some columns have been hidden. Unhide the columns. What is the **Product Name** for order **5023-1**?

1 / 1 point

**W04-Assessment**  
XLSX File

Pencils

Yes, that's correct. Nicely done.

4. Order **5024-1** was cancelled. Delete row 11 (not just the data). What is the updated average in cell **S1**? (Please put the number only, no currency symbols)

1 / 1 point

1156.53

Yes, that's the correct answer. You have done a great job with this question.

5. You need to find out about the most recent shipment. Sort the data by **Ship Date**. What was the **Order Quantity** for the most recent item?

1 / 1 point

31

Yes, well done. Great detective work! Your Excel skills are getting better by the day.

6. You need to check the most recent furniture item. Sort the data by **Product Category** (A-Z) and then **Order Date** (Newest to Oldest). What is the **Customer Type** for the most recently ordered Furniture Item?

1 / 1 point

- ☒ Corporate  
☐ Small Business  
☐ Home Office  
☐ Consumer

✓ **Correct**

Yes, that's it. Well done - onto the next challenge

7. You have been asked to find out about orders placed by the customer Cindy Chapman. Filter the data to show only her orders. How many orders had Tina Carlton as the Account Manager?

1 / 1 point

6

✓ **Correct**

Yes, that's correct. You really got the section on Filtering.

8. Clear the previous filter. Use filters to find out how many orders were for Home Office customers, where the Account Manager is Leighton Forrest, with a High priority.

1 / 1 point

3

✓ **Correct**

Great work. Your skills are ever-expanding. Your hard work is paying off.

9. Clear the previous filters. Use filters to find out how many orders were for Office Supplies and had a Total over \$7,000.

1 / 1 point

5

✓ **Correct**

Yes, well done. You have used the Filter correctly to get the right answer.

10. Clear the previous filters. Apply a new filter to show the top 1% of orders by Total. What is the Average Quantity for the top 1% (cell **M1043**).

0 / 1 point

50

Correct Ans -> 46

11. Use the find tool to find order number **6044-1**. What is the **Quantity** for this order?

1 / 1 point

26

✓ **Correct**

That's exactly right. The Find tool is a quick way to navigate to specific sections in a large worksheet.

12. Tina Carlton has recently married and has chosen to take her partner's name. Start by clicking in cell **A1**. Use **Find and Replace** to replace all instances of Tina Carlton with Tina Shaw. Check the message — how many replacements were made?

1 / 1 point

On a Mac, go to the **Edit** menu > **Find > Replace**.

137

✓ **Correct**

Great work. Your skills are ever-expanding. Give yourself a clap on the shoulder.
