1. The attached workbook is needed to answer all the questions associated with this quiz. Open the attached workbook and investigate what this document will look like when printed (do not actually print). How many pages will print?

1 / 1 point

📎 **W05-Assessment**
XLSX File

3

✓ **Correct**

Great work. Now that you are warmed up, let's get on with the next questions!

2. What Margin setting has been selected?

1 / 1 point

- ☐ Wide
☐ No Margin
☒ Narrow
☐ Normal

✓ **Correct**

Yes, excellent work. Did you find where you needed to look for the answer straight away?

3. Which Orientation has been selected?

1 / 1 point

- ☐ Portrait
☐ A4
☒ Landscape
☐ Letter

✓ **Correct**

Landscape is the correct page orientation for this worksheet.

4. A Custom Scale has been applied.

1 / 1 point

- ☒ True
☐ False

✓ **Correct**

Great work. Your skills are ever-expanding. Your hard work is paying off.

5. How many page breaks have been added?

1 / 1 point

For Mac users, switch to the **Page Layout** view, then back to **Normal** to see the page breaks. Manual page breaks will still be dotted lines.

You can also use the **Print Preview** to find out the number of pages. The number of added page breaks is 1 fewer than the number of pages.

2

✓ **Correct**

Yes, nice work. There are two page breaks in this worksheet.

6. If we wanted to insert another page break between rows **20** and **21** we would need to click on which cell first? (We only want to add a horizontal page break). For your answer, enter a cell reference e.g. **B5**.

1 / 1 point

A21

Yes, fantastic work. Whenever you need to add a page break, select the cell just below and to the right of where you want the break to occur.

7. For the printed version of the page, based on the existing setup, which of the following is true? (One or more answers may be correct)

1 / 1 point

- ☐ Total Number of pages has been added to the footer
☐ A page number has been added to the header
☒ A page number has been added to the footer

Yes, that's the right answer. The page number is sitting right at the centre of the footer.

- ☐ Total Number of pages has been added to the header

8. For the printed version of the page, based on the existing setup, the first four rows repeat on every page. To stop this we would:

1 / 1 point

- ☐ Untick Headings (on Page Layout Tab)
☒ Adjust settings in Print Titles
☐ Adjust settings in Custom Margins
☐ Remove Page Breaks

Yes, that's exactly right.

9. If we insert a column between **C** and **D** which of the following happens? (One or more answer may be correct)

1 / 1 point

- ☐ We now have 6 pages to print
☐ Nothing changes
☐ We get another page break
☒ The custom scaling changes

Yes, spot on. Excel behaves really cleverly like that.

10. Before we can manually change the custom scaling, we must:

1 / 1 point

- ☒ Set Page Width to Automatic
☐ Reset Page Breaks
☐ Remove Print Titles
☐ Set Orientation to Landscape

Yes, great work. You should be very proud of yourself. Your Excel skills are getting better and better!
