1.

Which of the following does the **Name Manager** allow us to do?

(Multiple answer possible. Partial credit awarded)

1 / 1 point

☑ Change the range of a named range.

✓ **Correct**
Yes, the name manager allows us to change the range of a named range.

☐ Change the scope of a named range.

☑ Delete a named range.

✓ **Correct**
Yes, the name manager allows us to delete a named range.

☑ Add a named range.

✓ **Correct**
Yes, the name manager allows us to add a named range.

2.

The same range can have more than one name

1 / 1 point

● True

○ False

✓ **Correct**
Interestingly, this is allowed in Excel. The same range *can* have more than one name.

3.

The **Name Manager** tool can be found on which ribbon tab?

1 / 1 point

○ **Home**

○ **Data**

○ **Insert**

● **Formulas**

✓ **Correct**
Great work here!

4.

Uma and Sean started their Monday morning with an argument. Uma thinks if you accidentally delete the wrong named range there is no need to worry, Excel will replace any range in a calculation that depends on this range with cell references. Sean strongly disagrees and suggests that the calculation will break down. Who is right?

1 / 1 point

- ◯ Uma
- ◉ Sean

✓ **Correct**
Yes, Sean is right in this instance.

5. How do you find out whether there are any named ranges in a workbook?

1 / 1 point

(Multiple options possible. Partial credit awarded)

- ☑ Click on the **Name Box**.

✓ **Correct**
Yes! This will show you if there are any named ranges.

- ☐ Press F4.
- ☑ Click on the **Name Manager**.

✓ **Correct**
Yes! This will show you if there are any named ranges.
